### PROP 65 WARNING

To whom it may concern,

The purpose of this letter is to acknowledge that Elevate Environmental Consultants Inc. (Elevate) performed a California Proposition 65 evaluation of Culligan International Company's (Culligan's) ZIP water product line. The conclusion of that evaluation was that none of the ZIP water products evaluated require exposure warnings under the provisions of Proposition 65.

#### **Evaluation Summary**

Elevate prepared a report documenting its evaluation of Culligan's ZIP water products dated June 28, 2019 and titled Addendum A to Proposition 65 Compliance Evaluation of Culligan Water Products: Proposition 65 Compliance Evaluation of ZIP Water Products. The products evaluated were the BCS, BC, and CS products in the ZIP Water line, as well as a filter used with the ZIP products. The evaluation was performed using standard risk assessment methodology and guidance with respect to estimation of chemical intakes. This evaluation incorporated information provided by Culligan regarding typical usage and configurations of products. Laboratory test results of the products were provided to Elevate to support these estimations. The results of the evaluation supported that none of the ZIP products addressed by the evaluation require exposure warnings under the provisions of Proposition 65.

Sincerely,

Elevate Environmental Consultants Inc.

John McLaughlin, P.E.

President

(530) 400-1219
