Our Story

The beginning of ASKO was an act of love – no more, no less. In the 1950s, a young farmer in Jung, south of Lidköping in Sweden, saw his mother's predicament: washing by hand is wet, cold, hard and heavy. He wished to ease her burden, and so he invented his own washing machine.

It had superior cleaning performance, with built-in water heating, spinning and a durable stainless steel structure. When others saw his machine, they wanted one too. Pretty soon, production began.

More than 70 years later, ASKO is a global brand that designs and develops premium kitchen and laundry appliances for homes and businesses. We manufacture our products to the highest possible standards and develop our domestic appliances based on professional principles.

Today, ASKO helps people around the world to cook, clean and care for their families while looking after the environment. With a uniquely Scandinavian approach, ASKO combines award-winning design with innovative features and smart solutions. We create products and services that are destined to become a much-loved part of people's homes and lives.

Dishwashers

With our range of ASKO dishwashers we give you value for money in every detail. With sturdy flexible racks and among the lowest water and energy consumption on the market, they will meet all your demands when choosing a new dishwasher. Our XXL models, have the world's largest loading heights, and a unique flexible four rack system with place for up to the dinner settings you need for 17 persons - which is equal to nearly 200 items!

Why choose ASKO Dishwashers?

MORE STEEL, LESS PLASTIC

ASKO's dishwashers are made of stainless steel; no other dishwashers have so many details in steel instead of plastic. No other material lasts as long as steel. This is why we produce our dishwashers with 8 Steel™; eight of the most important components are made of high-quality steel rather than plastic, such as; container, loading racks, spray pipe, spray arms, strainers, outer base, feet, and inner door. Our machines are built to last longer, and they do.

WORLD'S LARGEST CAPACITY

Our dishwashers offer loading capacity for up to 17 place settings and room for larger plates and taller glasses. The interior loading tub measures between 21.26 inches high for our XL dishwashers and 22.83 inches high for our XXL dishwashers allowing you to load up to 40% more dishes compared to other dishwashers. Depending on the model, ASKO offers the possibility of loading on two or three levels.

Our dishwashers offer the largest amount of internal space while maintaining standard external dimensions. They fit in a space of 34-36 in (XXL) or 32-34.5 in (XL).

SUPERIOR CLEANING SYSTEM

The Super Cleaning System+™ thoroughly cleans the tub, water recycling tank, and spray system to improve both washing performance and the machine's longevity.

QUIET AND POWERFUL

Your ASKO dishwasher is so silent, down to 40 dB(A), that we had to design a convenient feature: the Status Light™. Blue signifies when you can still open the door to load more items, red signifies when it's too late to do so and green signifies when the dishes are ready.

For all of us who let the dishwasher work while we sleep, we have created night mode. With this mode the water pressure in the spray arms is lowered, reducing the noise level by as much as 2 dB(A). This mode is also perfect for open floor plans with seamless kitchen and living spaces.

TURBO DRYING™

No one wants to spend time drying dishes by hand before they go back into cabinets. That's the dishwasher's job, and ASKO has perfected their technology to keep consumers from having to do this extra task. Turbo Drying™ with sensor control ensures that your dishes are completely dry in the shortest possible time, while using the minimum amount of energy possible.

SCANDINAVIAN DESIGN

Beyond the logic and the interfaces, we want ASKO appliances to express our Scandinavian design values – through premium materials and minimalistic design they refine your home, without taking over. We design our products to make sure they support and enhance their environment. We want your kitchen experience to be less cluttered and more relaxing and enjoyable.

But, to us design is more than just appearance. It is also about user friendliness, function, quality and the environment. By developing long lasting products, we contribute to a reduced environmental footprint and a low life cycle cost for our customers. Since our products last longer, we also incorporate a timeless design in order to last aesthetically.

Dishwasher Features

Super Cleaning System+™

Our Super Cleaning System+™ (SCS+) will save you time, electricity, water and effort, by eliminating the handwashing step for consumers. This patented system cleans the fine filter and all the interior surfaces after pre-wash, and before running the main wash.

Turbo Drying™

Get every load completely dry. After the final rinse, the moist air inside the dishwasher is mixed with the dry air outside of the dishwasher which dries dishes, glassware, and cutlery completely.

World Class Loading Capacity

Our dishwashers have world class loading capacity with room for larger plates and taller glasses, 16-17 place settings (depending on model). It also means that you can load 40% more compared to a standard dishwasher.

Beautiful, Timeless, Elegant and Efficient

Our current 30, 40, and 50 series dishwashers have earned the Most Efficient energy label. Equipped with reliable, brushless motors, making the engine quieter, down to 40 dB(A). Enhance your favorite dishwashing program with modes that reduce cycle time, noise, water consumption and energy consumption.

8 Steel™

No other material lasts as long as steel. And no other dishwashers have as many details made from steel instead of plastic as ASKO dishwashers. In fact, eight of the most important components in our dishwashers are made of high-quality steel rather than plastic.

9 Spray™

ASKO's spray system consists of up to 9 highly effective spray zones which ensure that the whole load gets totally clean, two of them are Power Zones™. The two Power Zones™ are located under the lower rack, making the washing performance perfect even for the dirtiest pots and pans.

Intuitive and effective programs

Our dishwashers offer a wide variety of cleaning programs, which can be adapted and fine-tuned to suit your needs – from faster, quieter cleaning cycles to more environmentally friendly performance. Each program has undergone rigorous development and testing at our research and development center for dishwashers in Sweden.

DISHWASHER PROGRAMS

Normal

A powerful program for daily use when you want to clean plates, cutlery and glasses after the evening dinner. It removes dried leftovers from your dishes and also cleans pots and pans.

Eco

This program is ideal for cleaning regularly soiled dishes and is the most effective in terms of combined energy and water consumption.

Auto

This program measures how dirty the dishes are and automatically adjusts program parameters, water consumption and temperature accordingly. When newly installed, the program must be run five times before it is fully adapted and can provide optimal results. (Available on 40 and 50 series)

Light

A powerful program for daily use that is shorter than the Normal program. Removes dried food, but is not intended for burnt food, such as oven dishes. This program provides maximum rinse effect.

Time program

This program adapts to the specified running time or finish time. When using this program, it is important to select a time that suits how soiled the dishes are.

Rinse and hold

With this program you can rinse dishes while waiting for the dishwasher to become fully loaded.

Plastic

This program has an extra-long drying phase and is ideal for washing plastic items that are dishwasher safe. It is also suitable for porcelain and glasses.

Sanitize

This program is perfect for times when hygiene demands are extra high, for example, when cleaning baby bottles and cutting boards. The temperature is high in both the main wash and in the final rinse

Crystal

A gentle low-temperature program ideal for cleaning fragile items like fine wine glasses and crystal. This program can also be used to clean recently used porcelain providing it is free of dried leftovers.

Self-cleaning

The self-cleaning program is designed to clean the dishwasher itself and ensures that the dishwasher tub, spray arms and spray pipes are cleaned to the highest hygienic standards.

Upper half wash

This program is used when you only want to clean cups and glasses loaded in the upper basket. You also have the option of loading slightly soiled dishes in the lower basket, where they will be cleaned.
(Available on 30, 40 and 50 Series)

Lower half wash

This program is used when you only want to clean plates and cutlery loaded in the lower basket. You also have the option of loading slightly soiled dishes in the upper basket, where they will be cleaned.
(Available on 30, 40 and 50 Series)

DISHWASHER MODES

Intensive Mode

A high-temperature program designed to dissolve grease on extremely soiled dishes such as pans, casserole dishes and oven dishes. If these dishes do not completely fill the dishwasher, you can safely add plates and other dishes.

Green mode

Green mode saves both water and energy. The temperature is lowered and each stage of the cycle is extended to save water and achieve the same perfect cleaning results as a normal program. Models featured with AUTO program will have a water consumption level down to 2 gallons including two fresh water rinses depending on soil level.

Speed mode

If you want your dishes cleaner faster, select speed mode to reduce the program running time by 50%. To achieve the best possible washing results in the time available, more water and energy are used.

Night mode

For those who like to let the dishwasher clean while they sleep, we have created night mode. With this mode the water pressure in the spray arms is lowered, reducing the noise level by as much as 2 dB(A). This quieter mode is also perfect for open floor plan living spaces.

Laundry

Despite our over 70 years in the industry, we do not rest on our laurels, we always strive to understand how we can make our products even better. This time around we have done our best to learn from real people, finding out what they think are the biggest problems in the laundry room.

We combined these insights with our years of experience in both residential and commercial laundry to create a generation of attractive, user-friendly, innovative and long-lasting washing machines and tumble dryers.

Why choose ASKO Laundry?

MORE STEEL, LESS PLASTIC

A fully steel tub reduces bad smells inside the washing machine – and therefore, on your clothes. It helps eliminate the films of bacteria and fungi that create nasty odors in the washing machine that can be transferred to your laundry. ASKO washing machines also have double stainless steel drums – in which the outer drums are also made from stainless steel, instead of plastic.

BUILT LIKE A PROFESSIONAL

ASKO washing machines and dryers have a long-lasting and exclusive design along with innovative functionalities designed to make your everyday life easier. They are manufactured with high-quality steel parts that can withstand the test of time. ASKO follows the most recent quality management standards (ISO 9001) and complies with the most rigorous environmental standards (ISO 14001, EMAS). ASKO is a Scandinavian brand that is globally recognized for its design and performance.

SCANDINAVIAN DESIGN

The combination of everyday functionality, environmental concern and clean, pleasant lines is the principal hallmark of Scandinavian design – and that of ASKO. The fundamental idea is that carefully designed products should improve people's quality of life. To distinguish ourselves in a market of cluttered, complex and voluptuous designs, we aim for a soft, humanistic minimalism based on the principle of quiet being the new loud. The key elements of Scandinavian design – understated elegance, high-quality craftsmanship and natural materials – are reflected in ASKO's design language. Much emphasis is also placed on functionality. We strive to make life easier by offering truly user-friendly interfaces, integration of practical functions and trouble-free, durable products that please people for a long time.

QUATTRO CONSTRUCTION™

All our washing machines have the unique Quattro Construction™. Noise level and vibration control are becoming increasingly important as it becomes more common to live in apartments with the laundry room close to living areas. Our contribution to better living conditions for people living next door to the washer is called Quattro Construction™. This is a unique yet simple system consisting of a stainless steel inner and outer drum, cast iron counter weights and four shock absorbers that transfer the vibrational energy from the outer drum to the bottom plate of the machine. In fact, the entire construction stands inside the casing and spins at maximum rpm, achieving virtually no vibrations. The Quattro Construction™ system is extremely durable and prolongs the life of the entire machine.

HYGIENIC STEEL SEAL™

A better alternative to the traditional rubber seal is the hygienic and maintenance-free Steel Seal™ solution that you find on all ASKO washing machines. There is simply no place for dirt to gather, eliminating the need for regular cleaning.

BUTTERFLY DRYING™

This smart tumble dryer feature is our own invention. It saves both the motor and your ironing board. The unique paddles inside the drum tumble the clothes in a figure eight motion to prevent the clothes from bundling. This leads to a reduced need to reverse the drum rotation. This is an intelligent function which saves the motor and the belt from any unnecessary strain and your clothes from creasing.

Design

Classic

Our Classic models have a program for every living situation and with the four run modes, you can quickly adjust the programs to make them either more environmentally friendly or wash more intensively. The interface is easy to understand and straightforward to use with a selection knob for program selection and buttons for each option. The front plate, panel and controls have the same timeless, discreet and elegant white design that will last forever.

Logic

For the Logic models we focused on a minimalistic appearance with sleek lines and a balanced color scheme between the front plate, panel and display. Harmony is key here and the Logic models are suited to all types of integration where appearance is important. This is the logical choice for everyone and caters to the need for both design and function.

Style

The Style models have a full-size front made from a single piece of solid steel that surrounds the stylish horizontally brushed aluminium panel. The front, panel, display and other visible components boast a perfect fit and finish and the full-color high-definition TFT display provides the best possible overview of the available functions, modes, and status. We have not compromised on any material, which is why all the knobs and buttons are made of carefully polished metal and designed to offer the best feel and response when used.

Classic

Logic

Style

Washing Machine Features

Steel Seal™ door for better hygiene

A common feature of all commercial washing machines, whether they are used in hotels, beauty salons or retirement homes, is that they have no rubber seal. And there's good reason. Eliminating a rubber door seal that can degrade over time and trap dirt and grime ensures a more hygienic wash. You will also find loading and unloading easier with the Steel Seal™ door solution. All ASKO washers have this long lasting door solution.

Quattro Construction™ for long-life operation

Our contribution to better living conditions for people living next door to the washer is called Quattro Construction™. This is a unique yet simple system consisting of a stainless steel inner and outer drum, cast iron counter weights and four shock absorbers that transfer the vibrational energy from the outer drum to the bottom plate of the machine.

Auto Dose system – dosing with precision

With the Auto Dosing system, the only thing you need to do is select the soil level of the load and then leave the rest of the decision making to the clever algorithms that control the Auto Dose system. In addition to always delivering exactly the right amount of detergent, the Auto Dose system ensures that the water and detergent are well mixed before reaching the clothes in the drum.

Active Drum™

The hourglass-shaped lifters guide the load to the gentler center area of the drum. The load is better balanced in the drum reducing wear and tear on drive belt and motor. All lifters are removable for easy cleaning.

Long-life brushless motor

Our washing machines are fitted with brushless motors to ensure that the machine can cope with the highest spin speeds while reducing noise levels and increasing the life of the machine. High efficiency ensures reduced energy consumption and the motor also allows for speed control, enabling the further development of washing programs.

ASKO Pro Wash™ provides extra washing power

Instead of just relying on the water at the bottom of the drum, the ASKO Pro Wash™ system actively circulates the water and detergent mix from the bottom of the drum to the top. On the top of the drum there are two nozzles that spray the mix over the inner drum efficiently soaking the entire load. This means the load is soaked faster, which enables superb washing and rinsing performance even with very short washing cycles.

Tumble Dryer Features

Butterfly Drying™

This smart feature is our own invention. It saves both the motor and your ironing board. The unique paddles inside the drum tumble the clothes in a figure eight motion to prevent the clothes from bundling. This leads to a reduced need to reverse the drum rotation. This is an intelligent function which saves the motor and the belt from any unnecessary strain and your clothes from creasing.

Steam refresh program

With the steam function, our heat pump dryers offer you a product that takes caring for your clothes to a new level. Steam is a highly effective and gentle means to care for your shirts, jackets and trousers. It is an easy way of getting your favorite shirts creaseless, but can also be used for refreshing clothes that don't need washing.

Stainless steel Active Drum™

At ASKO, we believe not only that stainless steel will outlast plastic, but also that quality materials will always look better in years to come. Eventually, galvanized steel rusts, so we decided to make our drums out of stainless steel. That's why our tumble dryers really do last longer.

Soft Drum™ and Air Lift™ paddles

Soft Drum™ is a solution developed to enhance air flow around the load, thereby increasing the drying effect. The circular indentations with beveled edges also have a cushioning effect reducing wear and tear on fabrics. The design allows for even and gentle drying with both small and large loads. We also feature a new paddle design in the shape of the Air lift™ paddles, designed to lift the load as high as possible for increased time in the air to enhance the drying effect and shorten the drying time.

Brushless motor

The motor in your new ASKO tumble dryer will not break down. Want to know the secret? It's because we have fitted our tumble dryers with strong and very long-lasting brushless motors, which are also quieter and more energy efficient. The key word here is "brushless", because brushes wear out and without them that's one less part that can break.

There's always room for a heat pump dryer

ASKO's heat pump dryers are closed systems in which the processed air constantly circulates inside the tumble dryer, making it possible to install them in confined spaces, with little incoming air. Easy to integrate and install.

Dry with more air and less heat

To dry clothes quickly and gently, you must use the air that circulates in the drum as efficiently as possible. Our two lifters have a high and a low side placed on opposite sides of the drum. The clothes will thus fall irregularly in the drum which prevents them from bundling, allowing better air circulation through the clothes.

How can a heat pump be gentle on your clothes?

The air is dehumidified with the help of an evaporator instead of heat only, which means that lower temperatures can be used in the drying process. This, in turn, makes the drying gentler on fabrics without any loss in drying capacity or effectiveness. As well as gentler drying, the heat pump dryer also reduces the risk of clothes shrinking and even very sensitive fabrics can be dried.

A Soft Drum™ made of stainless steel

Soft Drum™ is a solution developed to enhance air flow around the load, thereby increasing the drying effect. The circular indentations with bevelled edges also have a cushioning effect that reduces wear and tear on fabrics. The new drum design allows for even and gentle drying with both small and large loads.

The heat pump process

ASKO's heat pump dryers are closed systems in which the processed air constantly circulates inside the tumble dryer, in contrast to condenser and vented dryers that consumes and release over 7000 cubic ft. of air per program cycle, which places great demands on the supply air and ventilation. Our heat pump dryers are designed so that, in principle, no air needs to be added.

- 1** The compressor drives the refrigerant through the evaporator and the condenser.
- 2** When the refrigerant is pushed from the larger pipes in the evaporator to the smaller pipes in the condenser it transforms from a cold liquid into a warm gas which heats the air.
- 3** The warm air absorbs the moisture from the damp clothes.
- 4** The moist air is transported via a duct, where it finally reaches the cold part of the evaporator where it is condensed into water.

Refrigerant

The fluid used in the heat pump process. It undergoes phase transition from a liquid to a gas and back again.

Evaporator

In this device the liquid refrigerant is evaporated into gas form. In this case the evaporator also works as a dehumidifier of the moist warm air from the wet clothes.

Condenser

This device has smaller pipes that increases pressure and density of the gas resulting in heat.

Save energy!

Our heat pump dryers consume only 1.77 kWh per program for a 15lb load.

Heat pump dryers are easy to install

Our heat pump dryers can be installed in rooms with a lower level of ventilation and unlike ordinary tumble dryers, they can also be installed in confined spaces. Large air gaps are not required around our heat pump dryers and the drying process is not negatively affected by a warm or humid climate, unlike ordinary tumble dryers. Thanks to the closed system, the air around the dryer is not heated, which leads to energy gains in buildings with climate control/air conditioning.

Condensed water evacuation

The water generated during drying is collected in a large water tank that is easy to remove and empty. All our dryers can also be connected to drains, which means that you do not have to worry about emptying the water tank. This is an ASKO-unique feature.

Your laundry room just got bigger!

Do you have problems finding space for your ironing board? Have you looked between the washer and the dryer? We have! Right there is a simple yet obvious and well-conceived solution that is always on hand when you need to iron your clothes, but safely and invisibly stored away when not in use.

Shown with Hidden Helper Ironing Board

HIDDEN HELPER BASKET

Removable rack

A pull-out basket that is easily accessible from the dryer, and has a push-pull door opening with a large removable rack. This is a solution that is useful for removing laundry and carrying it to the closet for ironing and folding.

HIDDEN HELPER PEDESTAL

Storage and improved ergonomics

A useful storage drawer with a height of approximately 12 inches. Ideal for storing your detergent, softener, coat hangers, pegs, user manuals and other useful items in the laundry area. Place it beneath your washer and dryer and you'll have a better working height when loading and unloading. The drawer also comes with a shelf for more easily loading and unloading of your laundry.

HIDDEN HELPER DOUBLE SHELF AND BASKET

Keep it simple with a shelf and a handy basket

The wire basket and pull-out shelf can be used as an additional surface space when folding clothes and sorting socks - or for storage. The basket can be used to carry your clothes to the closet. Now that's practical!

HIDDEN HELPER IRONING BOARD

Washing Programs

In conjunction with the launch of our new generation of washing machines, we are also introducing several new programs. See further down this page for descriptions of the new programs. Other programs are: Standard cotton, Mix/synthetic, Quick, Heavy, Rinse, Spin, Drain, and Easy care.

Wool / Hand Wash

The wool program is gentle to maintain the structure and shape of the garment.

Auto

Just fill the machine, select Auto wash, and start. This convenient program is used for both white and colored washes. It adapts the amount of water, number of rinses and washing time to the weight of the laundry.

Drum Cleaning

Clean the drum, hoses, detergent compartment and drain pump. Use a little detergent and vinegar that effectively removes detergent residues. Do not load the washing machine with any laundry.

Time

Choose a cycle time from 20 minutes up to 3 hours. The washing machine optimizes the program to ensure the wash is as effective as possible for the time you have chosen.

Everyday (Universal)

Designed to handle those day to day situations with a variety of different lightly to moderately soiled clothes that need to be washed.

Bedding

For washing large items such as bed sheets, duvets and pillows. This program uses extra water and additional rinses.

Dark Wash

Treat your dark wash as you treat your white wash: with a dedicated program and detergent for black fabrics. The program washes at low temperatures, with gentle tumbling and lower spinning rate.

Stain

The smart stain program is a fast way to choose the right treatment for both the type of stain and type of fabric. Select from: Red wine, Blood, Grass, Blueberries, Butter/Grease, Chocolate, Coffee/Tea, Egg, Dairy, Kids, Baby.

* See table of programs on Page 50

Drying Programs

Our new generation of tumble dryers have up to sixteen different programs to choose from, with eight of them being introduced along with our new generation tumble dryers. Other programs available are: Synthetic, Jeans, Terry, Sports Wear, Conditioning, and Airing.

Auto

For drying thicker non-sensitive cotton laundry. All auto programs stop automatically when the clothes are dry.

Bedding

For drying large items such as double sheets and duvet covers. This program uses a low temperature, more time and reverse drum movements to prevent the laundry from bundling.

Quick Pro

With this program you can get your wash completely dry in less than an hour.

Steam refresh

Ideal for freshening up garments such as suit jackets, wool sweaters and other items that would normally be dry cleaned or otherwise treated. Steam is very effective at removing odors from cigarette smoke to fire smoke. (Available on Logic Heat Pump models)

Steam wrinkle care

Repetitive steam injections and heat treatment to eliminate creases in the fabric. Low heat is used to also cater for sensitive fabrics. Steam care can be used with up to six shirts at a time.

Shirts

A program for shirts and blouses that dries at a low temperature with reverse drum movements. The program runs until the fabric is almost dry, with just a small amount of moisture remaining to prevent creasing.

Timed

Use this program for non-sensitive laundry that is still slightly moist and has to be thoroughly dried. In the time program, remaining moisture is not detected automatically.

Silk & Wool

This program uses a low temperature and stops just before the fabric is completely dry for maximum gentleness for sensitive fabrics such as silk and wool.

* See table of programs on Page 51

Drying Cabinet

Drying cabinets are common in Scandinavia, where the climate often requires that you can dry all types of clothes quickly, even coarse outerwear and shoes. A drying cabinet is practical but also gentle on your most sensitive fabrics since it uses no mechanical action that can wear your clothes, the air stream transports residual moisture and it's almost like drying outdoors.

Drying with extra care

Check the labels on your clothes and you'll see that many garments and materials need very careful treatment. Silk, velvet and satin, for example, need to be handled with care. That's when a drying cabinet comes in handy.

Less mess

With a drying cabinet, you can dry your family's sweaters, shirts, coats, shoes, gloves and more in a neat, organized way. It's a brilliant way of taking care of your family's clothes while keeping the house neat and tidy.

Also for shoe care

It's not just rubber boots that can be dried in a drying cabinet. All leather shoes need to rest between each use to allow moisture to escape. If you use them before they have dried, the seams will eventually break and they will lose their fit. Put them in the drying cabinet when you get home from work and they are ready for your evening walk an hour later.

24" DRYING CABINET

Features

- Super gentle drying of all kinds of fabrics and clothes
- Easy loading and unloading with pull-out hangers which are also foldable
- Special hangers for gloves, socks and linens.
- Special rack for effective drying of shoes
- Energy and time-saving automatic drying programs
- Loading capacity: approximately 9 lbs
- Dewatering capacity: 17 g/min
- Total drying length: 16 min
- Fan capacity: 180 m3/h
- Heating element effect: 1500 W
- Overheat cut-out
- Easy to clean surfaces and control panel

Pairs great with a stacked laundry pair and select hidden helper accessories (Excludes Single Laundry Care Shelf)

LIMITED WARRANTY – RESIDENTIAL APPLIANCES

ASKO warrants to the original purchaser (the “ASKO Customer”) of the ASKO product (the “ASKO Product”), who purchased the ASKO Product from a distributor, dealer, manufacturer’s representative or other seller who has been authorized by ASKO, that this ASKO Product is free of defects in materials and/or workmanship, subject to the terms and conditions set forth herein. This Limited Warranty covers parts and labor, except as set forth in this Limited Warranty. Service must be provided by an authorized ASKO service company. **YOUR SOLE AND EXCLUSIVE REMEDY UNDER THIS LIMITED WARRANTY SHALL BE PRODUCT REPAIR AS PROVIDED HEREIN.** This Limited Warranty is valid only when the ASKO Product is used in the country in which it was purchased. Proof of original purchase date is required to obtain service under this Limited Warranty.

Residential ASKO Products Used Exclusively for Household/Personal Purposes:

Two (2) Years limited Warranty – Any warranty service claims for residential ASKO Products must be filed with ASKO within two (2) years from date of purchase. Service will be provided during normal business hours.

Residential ASKO Products Not Used Exclusively for Household/Personal Purposes or used Commercially or used in Marine, Mobile or Aeronautical Applications:

One (1) Year limited Warranty – Any warranty service claims for ASKO Products not used exclusively for household and personal use, or used commercially or used in marine, mobile, or aeronautical applications must be filed with ASKO within one (1) year from date of purchase. Service will be provided during normal business hours.

ITEMS EXCLUDED FROM WARRANTY

This Limited Warranty does not cover:

1. Replacement parts or repair labor if the ASKO Product is used in a manner that is inconsistent with published user or operator instructions and/or installation instructions.
2. Service calls to correct the installation of the ASKO Product, to instruct you on how to use the ASKO Product, to replace or repair house fuses, or to correct house wiring or plumbing.
3. Consumable items and parts, such as filters.
4. Damage resulting from accident, alteration, misuse, abuse, negligence, fire, flood, acts of God, improper use, improper installation, installation not in accordance with electrical or plumbing codes, or use of products not approved by ASKO, as well as any attempted repair by other than authorized ASKO service companies.
5. Cosmetic damage, including scratches, dents, chips or other damage to the finish of the ASKO Product, unless such damage results from defects in materials or workmanship and is reported to ASKO within 5 days from date of purchase.
6. Pickup and delivery. The ASKO Product is intended to be repaired in your home.
7. Repairs to parts or systems resulting from unauthorized modifications made to the ASKO Product.
8. Expenses for travel and transportation for product service if the ASKO Product is located in a remote area where service by an authorized ASKO service company is not available.
9. The removal and reinstallation of the ASKO Product if it is installed in an inaccessible location or is not installed in accordance with ASKO’s published installation instructions.
10. Replacement parts or repair labor on ASKO Products with original model/serial numbers that have been removed, altered or cannot be easily determined.

DISCLAIMER

YOUR SOLE AND EXCLUSIVE REMEDY UNDER THIS LIMITED WARRANTY SHALL BE PRODUCT REPAIR AS PROVIDED HEREIN. EXPRESSLY DISCLAIMED ARE ALL OTHER EXPRESS AND IMPLIED WARRANTIES, INCLUDING ANY IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. Some jurisdictions do not allow exclusion or limitations regarding warranty rights. This Limited Warranty gives you specific legal rights and you may have other rights that vary from jurisdiction to jurisdiction. Attempted repair by any person other than an authorized ASKO service company will void this Limited Warranty.

LIMITATION OF LIABILITY

IN NO EVENT SHALL ASKO OR THE MANUFACTURER AND THEIR RESPECTIVE PARENTS, SUBSIDIARIES AND AFFILIATES BE LIABLE FOR CONSEQUENTIAL, INCIDENTAL, EXEMPLARY, PUNITIVE OR SPECIAL DAMAGES. IN NO EVENT SHALL ASKO OR THE MANUFACTURER AND THEIR RESPECTIVE PARENTS, SUBSIDIARIES AND AFFILIATES BE LIABLE FOR DAMAGES OTHER THAN ACTUAL DAMAGES AND IN NO EVENT FOR DAMAGES IN EXCESS OF THE PRICE PAID FOR THE ASKO PRODUCT AS TO WHICH A CLAIM IS MADE. Some jurisdictions do not allow the exclusion or limitation of incidental, consequential or other damages, so these limitations and exclusions may not apply to you. This Limited Warranty gives you specific legal rights. You also may have other rights that vary from jurisdiction to jurisdiction.

TROUBLESHOOTING & ASKO CUSTOMER CARE

If you think you need repair service, first see the “Troubleshooting” section of the Use & Care Guide. If you are unable to resolve the problem after checking “Troubleshooting,” then additional help can be obtained by calling ASKO Customer Care at 1-800-898-1879. Read the “Troubleshooting” chapter before contacting the Customer Care Center. Make a note of the details on the rating plate (see illustration below) positioned. Make a note of the (1) service number, (2) item number and (3) serial number.

SERVICE AFTER EXPIRATION OF LIMITED WARRANTY

For information about obtaining parts and labor after expiration of this Limited Warranty or arising outside the scope of this Limited Warranty, please contact ASKO Customer Care at 1-800-898-1879. After your purchase and prior to first use of the ASKO Product, register your ASKO Product with ASKO by utilizing the address information below. Should you need further assistance as well, contact us at the address information below:
