ASKO List Price Book
v26.4 Effective July 1, 2026

Our Story

The beginning of ASKO was an act of love – no more, no less. In the 1950s, a young farmer in Jung, south of Lidköping in Sweden, saw his mother's predicament: washing by hand is wet, cold, hard and heavy. He wished to ease her burden, and so he invented his own washing machine.

It had superior cleaning performance, with built-in water heating, spinning and a durable stainless steel structure. When others saw his machine, they wanted one too. Pretty soon, production began.

More than 70 years later, ASKO is a global brand that designs and develops premium kitchen and laundry appliances for homes and businesses. We manufacture our products to the highest possible standards and develop our domestic appliances based on professional principles.

Today, ASKO helps people around the world to cook, clean and care for their families while looking after the environment. With a uniquely Scandinavian approach, ASKO combines award-winning design with innovative features and smart solutions. We create products and services that are destined to become a much-loved part of people's homes and lives.

Dishwashers

With our assortment of ASKO dishwashers we give you value for money in every detail. With sturdy flexible racks and among the lowest water and energy consumption on the market, they will meet all your demands when choosing a new dishwasher. Our XXL models have the world's largest loading height and largest loading capacity rack system with space for up to the dinner settings you need for 18 people - which is over 200 items!

Why choose ASKO Dishwashers?

MORE STEEL, LESS PLASTIC

Designed to last for 20 years, ASKO's dishwashers are made of stainless steel; no other dishwashers have so many details in steel instead of plastic. No other material lasts as long as steel. This is why we produce our dishwashers with 8 Steel™; eight of the most important components are made of high-quality steel rather than plastic, such as; container, loading racks, spray pipe, spray arms, strainers, outer base, feet, and inner door. Our machines are built to last longer, and they do.

WORLD'S LARGEST CAPACITY

Our dishwashers offer loading capacity for up to 18 place settings and room for larger plates and taller glasses. The interior loading tub measures between 23 15/64 inches high for our XL dishwashers and 24 51/64 inches high for our XXL dishwashers allowing you to load up to 40% more dishes compared to other dishwashers.

Depending on the model, ASKO offers the possibility of loading on three or four levels.

Our dishwashers offer the largest amount of internal height while maintaining standard external dimensions. They fit in a space of 34-36 in (XXL) or 32-34.5 in (XL).

SUPERIOR CLEANING SYSTEM

The Super Cleaning System+™ thoroughly cleans the tub and spray system to improve both washing performance and the machine's longevity.

AUTO DOSE

Select dishwashers come equipped with Auto Dose, eliminating the need to add detergent before every load. Use ASKO's Gel Detergent or your favorite brand. Adjusts the dosage of detergent to the soiling level depending on program, water hardness level and program type to an optimal level to avoid overdosing and a minimizing the environmental footprint.

QUIET AND POWERFUL

Your ASKO dishwasher is so silent, down to 39 dB(A) (37 dB(A) with Night mode), that we had to design a convenient feature: the Status Light™. Blue signifies when you can still open the door to load more items, red signifies when it's too late to do so and green signifies when the dishes are ready.

For all of us who let the dishwasher work while we sleep, we have created night mode. With this mode the water pressure in the spray arms is lowered, reducing the noise level by as much as 2 dB(A). This mode is also perfect for open floor plans with seamless kitchen and living spaces.

TURBO COMBI DRYING™

No one wants to spend time drying dishes by hand before they go back into cabinets. That's the dishwasher's job, and ASKO has perfected their technology to keep consumers from having to do this extra task. Available in select models, Turbo Combi Drying™ combines fan-assisted drying and sensor controlled automatic door open drying to get a perfect drying result also for plastic to minimize moisture and shorten the program time to use the minimum amount of energy possible.

UV CLEANSE MODE

With regard to hygiene, one of the most remarkable new functions is UV Cleanse™, which uses UV light to help eliminate 99.99999% of the bacteria that can make its way into a load of dishes. Additionally, a special Hygiene program with an additional disinfecting effect can be used on loads that require extra-special care – like baby bottles.

During the final rinse, the water is sanitised with UV light and heat to kill microorganisms. The result is a market leading reduction of bacteria and other microbes. UV Cleanse mode in combination with Intensive or Sanitize programs eliminates up to 99.99999% of bacteria, fungi and viruses.

Available on 60+ Models

SCANDINAVIAN DESIGN

Beyond the logic and the interfaces, we want ASKO appliances to express our Scandinavian design values – through premium materials and minimalistic design they refine your home, without taking over. We design our products to make sure they support and enhance their environment. We want your kitchen experience to be less cluttered and more relaxing and enjoyable.

But to us, design is more than just appearance. It is also about user friendliness, function, quality and the environment. By developing long lasting products, we contribute to a reduced environmental footprint and a low life cycle cost for our customers. Since our products last longer, we also incorporate a timeless design in order to last aesthetically.

All New Features

- Turbo Combi Drying™ with Sensor Controlled Automatic Door Opening
- Basket Accent Color
- Brushless DC Motors
- Wine glass Holders
- Adjustable Power Zones

- 39dB(A) (37 dB(A) with Night mode)
- Push to Open Door
- UV Cleanse Mode
- 4 Baskets
- 18 Place Settings
- 10 Spray
- Sliding door model

THE WORLD'S MOST ADVANCED DISHWASHER!

Responsibility means a lot of different things. Today, there's a strong connection to sustainability, for example. The definition of sustainability is to make sure that things are kept in a state of equilibrium, or improved, rather than made worse.

The new ASKO dishwashers are designed to shoulder these responsibilities. In it, innovative and efficient features meet the most demanding standards of hygiene, efficiency, safety, and performance.

Long-lasting appliances are sustainable: and they need to be reliable, too, fulfilling their household responsibilities for a long time. As a result, this dishwasher is constructed with more steel than plastic and tested for the equivalent of 20 years' worth of use. So not only will it provide care, it will also act as a long-lasting companion – taking care of you and your household for longer.

With all this in mind – and all of these responsibilities considered, approached and met – **we feel confident in saying that this is the world's most advanced dishwasher.**

Auto Dose

Through years of research, we have identified the exact amount of detergent needed to deliver consistently perfect cleaning results. That's our job. Of course, we don't expect you to spend time thinking about this. That's why we designed Auto Dose. The auto dosing compartment in our dishwashers stores up to 30 days' worth of detergent. This means you only need to fill it once a month. Just load your dishes, choose your program, and you're ready to go. Hassle-free, as it should be.

UV Cleanse Mode

With regard to hygiene, one of the most remarkable new functions is UV Cleanse™, which uses UV light to help eliminate 99.9999% of the bacteria that can make its way into a load of dishes. A special Hygiene program with an additional disinfecting effect can be used on loads that require extra-special care – like baby bottles. Additionally, This ASKO dishwasher keeps itself spotless with a dedicated Self-cleaning program which deep-cleans the entire tank and circulation system.

Accent Colors

Inspired by the lichens on our Scandinavian seashore rocks and the bursting sprouts at spring time, our accent color helps you find the spots inside our dishwasher that needs extra attention. Parts which allow interaction is color coded for improved visibility and guidance.

WiFi Capability

The ConnectLife app lets you control and monitor your ASKO dishwasher remotely via your smartphone or tablet. You can look up the online user manual, change settings, check the machine's status and more. You can even start, stop and pause programs on the move. The app includes a step-by-step guide to help you find the best programs for you depending on what you're washing and how you prefer to wash it.

Super Cleaning System+™

Our Super Cleaning System+™ (SCS+) will save you time, electricity, water and effort, by eliminating the handwashing step for consumers. This patented system cleans the fine filter and all the interior surfaces after pre-wash, and before running the main wash.

Turbo Combi Drying™

Get every load completely dry. After the final rinse, the moist air inside the dishwasher is mixed with the dry air outside and sensor controlled automatic door opening of the dishwasher which dries dishes, glassware, and cutlery completely this system.

World Class Loading Capacity

Our dishwashers have world class loading capacity with room for larger plates and taller glasses, 16-18 place settings (depending on model). It also means that you can load 40% more compared to a standard dishwasher.

Beautiful, Timeless, Elegant and Efficient

Equipped with reliable, brushless motors, making the engine motors quieter, down to 39 dB(A) (37 dB(A) with Night mode). Enhance your favorite dishwashing program with modes that reduce cycle time, noise, water consumption and energy consumption.

8 Steel™

No other material lasts as long as steel. And no other dishwashers have as many details made from steel instead of plastic as ASKO dishwashers. In fact, eight of the most important components in our dishwashers are made of high-quality steel rather than plastic.

10 Spray™

ASKO's spray system consists of up to 10 highly effective spray zones which ensure that the whole load gets totally clean, two of them are adjustable Power Zones™. The two Power Zones™ are located under the lower rack, making the washing performance perfect even for the dirtiest pots and pans, or vases/baby bottles.

Sliding door opening system

The sliding door system ensures easy installation and a seamless, integrated look in your kitchen. The decorative door of the dishwasher slides up when the dishwasher is open and slides down when it's closed, which means there is only a two-millimeter gap between the bottom of the dishwasher door and the baseboard or drawer located below it.

* Model DSD565 on Page 15

Practical and pleasing to the eye, the sliding door system can remove the need to cut baseboards and ensures easier installation at height. It also ensures that the dishwasher works in perfect harmony with your kitchen – no matter what design you desire.

Perfect for elevated installation, long doors, and when the socket is flush with the door.

Door slides down when closing

Intuitive and effective programs

DISHWASHER PROGRAMS

Normal

A powerful program for daily use when you want to clean plates, cutlery and glasses after the evening dinner. It removes dried leftovers from your dishes and also cleans pots and pans.

Eco

This program is ideal for cleaning regularly soiled dishes and is the most effective in terms of combined energy and water consumption.

Auto

This program measures how dirty the dishes are and automatically adjusts program parameters, water consumption and temperature accordingly. When newly installed, the program must be run five times before it is fully adapted and can provide optimal results.

Light

A powerful program for daily use that is shorter than the Normal program. Removes dried food, but is not intended for burnt food, such as oven dishes. This program provides maximum rinse effect.

Quick Pro

A program with highest rating according to EU label standard for cleaning performance, still very short – 59 minutes. Only on models with adaptable water pressure.

Time program

This program adapts to the specified running time or finish time. When using this program, it is important to select a time that suits how soiled the dishes are.

Rinse and hold

With this program you can rinse dishes while waiting for the dishwasher to become fully loaded.

Plastic

This program has an extra-long drying phase and is ideal for washing plastic items that are dishwasher safe. It is also suitable for porcelain and glasses.

Sanitize

This program is perfect for times when hygiene demands are extra high, for example, when cleaning baby bottles and cutting boards. The temperature is high in both the main wash and in the final rinse

Intensive

A program with a high temperature to dissolve grease on very dirty dishes, such as pans, casserole dishes and oven dishes.

Crystal

A gentle low-temperature program ideal for cleaning fragile items like fine wine glasses and crystal. This program can also be used to clean recently used porcelain providing it is free of dried leftovers.

Self-cleaning

The self-cleaning program is designed to clean the dishwasher itself and ensures that the dishwasher tub, spray arms and spray pipes are cleaned to the highest hygienic standards.

Upper half wash

This program is used when you only want to clean cups and glasses loaded in the upper basket. You also have the option of loading slightly soiled dishes in the lower basket, where they will be cleaned.

Lower half wash

This program is used when you only want to clean plates and cutlery loaded in the lower basket. You also have the option of loading slightly soiled dishes in the upper basket, where they will be cleaned.

Anti-Odor

This function will activate the door fan which is normally used for evacuating moist air during the drying cycle.

* See Page 23 for availability of these programs per different dishwasher series.

DISHWASHER MODES

Normal Mode

A dishwasher mode designed for daily use, powerful enough to clean your dinner plates, pots and pans after a delicious evening.

Heat Boost Mode

A high-temperature program designed to dissolve grease on extremely soiled dishes such as pans, casserole dishes and oven dishes. If these dishes do not completely fill the dishwasher, you can safely add plates and other dishes.

Green Adaptive Mode

Green mode saves both water and energy. The temperature is lowered and each stage of the cycle is extended to save water and achieve the same perfect cleaning results as a normal program. Models featured with AUTO program will have a water consumption level down to 2 gallons including two fresh water rinses depending on soil level.

Speed Mode

If you want your dishes cleaner faster, select speed mode to reduce the program running time by 50%. To achieve the best possible washing results in the time available, more water and energy are used.

Night Mode

For those who like to let the dishwasher clean while they sleep, we have created night mode. With this mode the water pressure in the spray arms is lowered, reducing the noise level by as much as 2 dB(A). This quieter mode is also perfect for open floor plan living spaces.

UV Cleanse Mode

The water in the final rinse is sanitized with the UV light and by the heat from the last rinse to kill microorganisms. The dishwasher uses more energy, and the program time is extended.

Laundry

Despite our over 70 years in the industry, we do not rest on our laurels, we always strive to understand how we can make our products even better. This time around we have done our best to learn from real people, finding out what they think are the biggest problems in the laundry room.

We combined these insights with our years of experience in both residential and commercial laundry to create a generation of attractive, user-friendly, innovative and long-lasting washing machines and tumble dryers.

Why choose ASKO Laundry?

MORE STEEL, LESS PLASTIC

A fully steel tub reduces bad smells inside the washing machine – and therefore, on your clothes. It helps eliminate the films of bacteria and fungi that create nasty odors in the washing machine that can be transferred to your laundry. ASKO washing machines also have double stainless steel drums – in which the outer drums are also made from stainless steel, instead of plastic.

BUILT LIKE A PROFESSIONAL

ASKO washing machines and dryers have a long-lasting and exclusive design along with innovative functionalities designed to make your everyday life easier. Our domestic washers and dryers are based on our Professional platform. They are manufactured with high-quality steel parts that can withstand the test of time. ASKO follows the most recent quality management standards (ISO 9001) and complies with the most rigorous environmental standards (ISO 14001, EMAS). ASKO is a Scandinavian brand that is globally recognized for its design and performance.

SCANDINAVIAN DESIGN

The combination of everyday functionality, environmental concern and clean, pleasant lines is the principal hallmark of Scandinavian design – and that of ASKO. The fundamental idea is that carefully designed products should improve people's quality of life. To distinguish ourselves in a market of cluttered, complex and voluptuous designs, we aim for a soft, humanistic minimalism based on the principle of quiet being the new loud. The key elements of Scandinavian design – understated elegance, high-quality craftsmanship and natural materials – are reflected in ASKO's design language. Much emphasis is also placed on functionality. We strive to make life easier by offering truly user-friendly interfaces, integration of practical functions and trouble-free, durable products that please people for a long time.

QUATTRO CONSTRUCTION™

All our washing machines have the unique Quattro Construction™. Noise level and vibration control are becoming increasingly important as it becomes more common to live in apartments with the laundry room close to living areas. Our contribution to better living conditions for people living next door to the washer is called Quattro Construction™. This is a unique yet simple system consisting of a stainless steel inner and outer drum, cast iron counter weights and four shock absorbers that transfer the vibrational energy from the outer drum to the bottom plate of the machine. In fact, the entire construction stands inside the casing and spins at maximum rpm, achieving virtually no vibrations. The Quattro Construction™ system is extremely durable and prolongs the life of the entire machine.

HYGIENIC STEEL SEAL™

A better alternative to the traditional rubber seal is the hygienic and maintenance-free Steel Seal™ solution that you find on all ASKO washing machines. There is simply no place for dirt to gather. Unlike other front load washing machines, ASKO's Steel Seal™ eliminates the presence of smell and mold.

BUTTERFLY DRYING™

This smart tumble dryer feature is our own invention. It saves both the motor and your ironing board. The unique paddles inside the drum tumble the clothes in a figure eight motion to prevent the clothes from bundling. This leads to a reduced need to reverse the drum rotation. This is an intelligent function which saves the motor and the belt from any unnecessary strain and your clothes from creasing.

Designs

3 Series

The 3 Series delivers the essentials, built to last. It carries the fundamentals the whole platform rests on — Steel Seal™ hygienic door sealing, Quattro™ Construction, Active Drum™, stainless inner and outer drums, and the same tested-for-20-years build standard — in a straightforward package for buyers who want ASKO durability without the extras. A clear 4" display keeps 20 programs and 3 run modes simple to navigate. The L-drum W3LW adds a larger 2.4 cu. ft. drum, 1600 rpm spin, Auto Dose and Quattro™ Construction 2.0.

5 Series

The 5 Series redefines the everyday experience. The same large 7" color display presents 28 programs and 4 modes at a glance, with a memory function for the cycles you run most. Thoughtful details set it apart — an illuminated drum, Auto Dose with two detachable tanks, and Quattro™ Construction 2.0 with motorized door lock. It is also the only series offered in three finishes: white, titanium and graphite black, so the machine suits the room it lives in.

7 Series

The 7 Series is for those who won't compromise. Its control panel is a single piece of brushed steel, and the full-color 7" TFT display gives the clearest possible view of programs, modes and status. It carries the widest range we offer — 29 programs and 5 modes — including a dedicated Stain program, Night mode and Pro-wash. A hot water connection shortens cycles and lowers energy use, while Auto Rinse and Auto Dose take the guesswork out of every load. Quattro™ Construction 2.0 with motorized door lock keeps it quiet and steady even at full spin.

3 Series

5 Series

5 Series also available in Titanium and Graphite Black.

7 Series

Washing Machine Features

Steel Seal™ door for better hygiene

A common feature of all commercial washing machines, whether they are used in hotels, beauty salons or retirement homes, is that they have no rubber seal. And there's good reason. Eliminating a rubber door seal that can degrade over time and trap dirt and grime ensures a more hygienic wash. You will also find loading and unloading easier with the Steel Seal™ door solution. All ASKO washers have this long lasting door solution.

Quattro Construction™ for long-life operation

Our contribution to better living conditions for people living next door to the washer is called Quattro Construction™. This is a unique yet simple system consisting of a stainless steel inner and outer drum, cast iron counter weights and four shock absorbers that transfer the vibrational energy from the outer drum to the bottom plate of the machine.

Auto Dose system – dosing with precision

With the Auto Dosing system, the only thing you need to do is select the soil level of the load and then leave the rest of the decision making to the clever algorithms that control the Auto Dose system. In addition to always delivering exactly the right amount of detergent, the Auto Dose system ensures that the water and detergent are well mixed before reaching the clothes in the drum.

Active Drum™

The hourglass-shaped lifters guide the load to the gentler center area of the drum. The load is better balanced in the drum reducing wear and tear on drive belt and motor. All lifters are removable for easy cleaning.

Long-life brushless motor

Our washing machines are fitted with brushless motors to ensure that the machine can cope with the highest spin speeds while reducing noise levels and increasing the life of the machine. High efficiency ensures reduced energy consumption and the motor also allows for speed control, enabling the further development of washing programs.

ASKO Pro Wash™ provides extra washing power

Instead of just relying on the water at the bottom of the drum, the ASKO Pro Wash™ system actively circulates the water and detergent mix from the bottom of the drum to the top. On the top of the drum there are two nozzles that spray the mix over the inner drum efficiently soaking the entire load. This means the load is soaked faster, which enables superb washing and rinsing performance even with very short washing cycles.

Tumble Dryer Features

Butterfly Drying™

This smart feature is our own invention. It saves both the motor and your ironing board. The unique paddles inside the drum tumble the clothes in a figure eight motion to prevent the clothes from bundling. This leads to a reduced need to reverse the drum rotation. This is an intelligent function which saves the motor and the belt from any unnecessary strain and your clothes from creasing.

Steam refresh program

With the steam function, our heat pump dryers offer you a product that takes caring for your clothes to a new level. Steam is a highly effective and gentle means to care for your shirts, jackets and trousers. It is an easy way of getting your favorite shirts creaseless, but can also be used for refreshing clothes that don't need washing.

Stainless steel Active Drum™

At ASKO, we believe not only that stainless steel will outlast plastic, but also that quality materials will always look better in years to come. Eventually, galvanized steel rusts, so we decided to make our drums out of stainless steel. That's why our tumble dryers really do last longer.

Soft Drum™ and Air Lift™ paddles

Soft Drum™ is a solution developed to enhance air flow around the load, thereby increasing the drying effect. The circular indentations with beveled edges also have a cushioning effect reducing wear and tear on fabrics. The design allows for even and gentle drying with both small and large loads. We also feature a new paddle design in the shape of the Air lift™ paddles, designed to lift the load as high as possible for increased time in the air to enhance the drying effect and shorten the drying time.

Brushless motor

The motor in your new ASKO tumble dryer will not break down. Want to know the secret? It's because we have fitted our tumble dryers with strong and very long-lasting brushless motors, which are also quieter and more energy efficient. The key word here is "brushless", because brushes wear out and without them that's one less part that can break.

There's always room for a heat pump dryer

ASKO's heat pump dryers are closed systems in which the processed air constantly circulates inside the tumble dryer, making it possible to install them in confined spaces, with little incoming air. Easy to integrate and install.

Dry with more air and less heat

To dry clothes quickly and gently, you must use the air that circulates in the drum as efficiently as possible. Our two lifters have a high and a low side placed on opposite sides of the drum. The clothes will thus fall irregularly in the drum which prevents them from bundling, allowing better air circulation through the clothes.

How can a heat pump be gentle on your clothes?

The air is dehumidified with the help of an evaporator instead of heat only, which means that lower temperatures can be used in the drying process. This, in turn, makes the drying gentler on fabrics without any loss in drying capacity or effectiveness. As well as gentler drying, the heat pump dryer also reduces the risk of clothes shrinking and even very sensitive fabrics can be dried.

A Soft Drum™ made of stainless steel

Soft Drum™ is a solution developed to enhance air flow around the load, thereby increasing the drying effect. The circular indentations with bevelled edges also have a cushioning effect that reduces wear and tear on fabrics. The new drum design allows for even and gentle drying with both small and large loads.

The heat pump process

ASKO's heat pump dryers are closed systems in which the processed air constantly circulates inside the tumble dryer, in contrast to condenser and vented dryers that consumes and release over 7000 cubic ft. of air per program cycle, which places great demands on the supply air and ventilation. Our heat pump dryers are designed so that, in principle, no air needs to be added.

- 1** The compressor drives the refrigerant through the evaporator and the condenser.
- 2** When the refrigerant is pushed from the larger pipes in the evaporator to the smaller pipes in the condenser it transforms from a cold liquid into a warm gas which heats the air.
- 3** The warm air absorbs the moisture from the damp clothes.
- 4** The moist air is transported via a duct, where it finally reaches the cold part of the evaporator where it is condensed into water.

Refrigerant

The fluid used in the heat pump process. It undergoes phase transition from a liquid to a gas and back again.

Evaporator

In this device the liquid refrigerant is evaporated into gas form. In this case the evaporator also works as a dehumidifier of the moist warm air from the wet clothes.

Condenser

This device has smaller pipes that increases pressure and density of the gas resulting in heat.

Save energy!

Our heat pump dryers consume only 1.77 KWh per program for a 15lb load.

Heat pump dryers are easy to install

Our heat pump dryers can be installed in rooms with a lower level of ventilation and unlike ordinary tumble dryers, they can also be installed in confined spaces. Large air gaps are not required around our heat pump dryers and the drying process is not negatively affected by a warm or humid climate, unlike ordinary tumble dryers. Thanks to the closed system, the air around the dryer is not heated, which leads to energy gains in buildings with climate control/air conditioning.

Condensed water evacuation

The water generated during drying is collected in a large water tank that is easy to remove and empty. All our dryers can also be connected to drains, which means that you do not have to worry about emptying the water tank. This is an ASKO-unique feature.

Your laundry room just got bigger!

Do you have problems finding space for your ironing board? Have you looked between the washer and the dryer? We have! Right there is a simple yet obvious and well-conceived solution that is always on hand when you need to iron your clothes, but safely and invisibly stored away when not in use.

Shown with Hidden Helper Ironing Board

HIDDEN HELPER BASKET

Removable rack

A pull-out basket that is easily accessible from the dryer, and has a push-pull door opening with a large removable rack. This is a solution that is useful for removing laundry and carrying it to the closet for ironing and folding.

HIDDEN HELPER PEDESTAL

Storage and improved ergonomics

A useful storage drawer with a height of approximately 12 inches. Ideal for storing your detergent, softener, coat hangers, pegs, user manuals and other useful items in the laundry area. Place it beneath your washer and dryer and you'll have a better working height when loading and unloading. The drawer also comes with a shelf for more easily loading and unloading of your laundry.

HIDDEN HELPER DOUBLE

Keep it simple with a shelf and a handy basket

The wire basket and pull-out shelf can be used as an additional surface space when folding clothes and sorting socks - or for storage. The basket can be used to carry your clothes to the closet. Now that's practical!

HIDDEN HELPER PEDESTAL DRAWER

Storage and improved ergonomics

A useful storage drawer that raises your washer and dryer to a better working height for loading and unloading. Ideal for storing detergent, softener, hangers, pegs, user manuals and other laundry-room essentials.

HIDDEN HELPER IRONING BOARD

Always on hand, invisibly stored

A simple yet well-conceived solution that is always on hand when you need to iron your clothes, but safely and invisibly stored away when not in use.

HIDDEN HELPER LAUNDRY CARE BASKET

Removable rack

A pull-out basket that is easily accessible and has a push-pull door opening with a large removable rack. Useful for removing laundry and carrying it to the closet for ironing and folding.

HIDDEN HELPER LAUNDRY CARE SLIM SHELF

Extra surface exactly where you need it

A slim pull-out shelf that gives you additional surface space when folding clothes and sorting socks - or for storage. Tucks away out of sight between the washer and dryer when not in use.

Compatible with 3/5/7-Series laundry only. Not compatible with previous-generation Classic, Logic or Style models.

Washing machine and tumble dryer sets are stackable and pair great with select hidden helpers to maximize the space in your laundry room. Add a drying cabinet for the ultimate laundry care package.

(Excludes single laundry care shelf)

Washing Programs

In conjunction with the launch of our new generation of washing machines, we are also introducing several new programs. See further down this page for descriptions of the new programs. Other programs are: Standard cotton, Mix/synthetic, Quick, Heavy, Rinse, Spin, Drain, and Easy care.

Wool / Hand Wash

The wool program is gentle to maintain the structure and shape of the garment.

Auto

Just fill the machine, select Auto wash, and start. This convenient program is used for both white and colored washes. It adapts the amount of water, number of rinses and washing time to the weight of the laundry.

Drum Cleaning

Clean the drum, hoses, detergent compartment and drain pump. Use a little detergent and vinegar that effectively removes detergent residues. Do not load the washing machine with any laundry.

Time

Choose a cycle time from 20 minutes up to 3 hours. The washing machine optimizes the program to ensure the wash is as effective as possible for the time you have chosen.

Everyday (Universal)

Designed to handle those day to day situations with a variety of different lightly to moderately soiled clothes that need to be washed.

Bedding

For washing large items such as bed sheets, duvets and pillows. This program uses extra water and additional rinses.

Dark Wash

Treat your dark wash as you treat your white wash: with a dedicated program and detergent for black fabrics. The program washes at low temperatures, with gentle tumbling and lower spinning rate.

Stain

The smart stain program is a fast way to choose the right treatment for both the type of stain and type of fabric. Select from: Red wine, Blood, Grass, Blueberries, Butter/Grease, Chocolate, Coffee/Tea, Egg, Dairy, Kids, Baby.

* See table of programs on Page 57

Drying Programs

Our new generation of tumble dryers have up to sixteen different programs to choose from, with eight of them being introduced along with our new generation tumble dryers. Other programs available are: Synthetic, Jeans, Terry, Sports Wear, Conditioning, and Airing.

Auto

For drying thicker non-sensitive cotton laundry. All auto programs stop automatically when the clothes are dry.

Steam wrinkle care

Repetitive steam injections and heat treatment to eliminate creases in the fabric. Low heat is used to also cater for sensitive fabrics. Steam care can be used with up to six shirts at a time.

Bedding

For drying large items such as double sheets and duvet covers. This program uses a low temperature, more time and reverse drum movements to prevent the laundry from bundling.

Shirts

A program for shirts and blouses that dries at a low temperature with reverse drum movements. The program runs until the fabric is almost dry, with just a small amount of moisture remaining to prevent creasing.

Quick Pro

With this program you can get your wash completely dry in less than an hour.

Timed

Use this program for non-sensitive laundry that is still slightly moist and has to be thoroughly dried. In the time program, remaining moisture is not detected automatically.

Steam refresh

Ideal for freshening up garments such as suit jackets, wool sweaters and other items that would normally be dry cleaned or otherwise treated. Steam is very effective at removing odors from cigarette smoke to fire smoke. (Available on 7 Series models)

Silk & Wool

This program uses a low temperature and stops just before the fabric is completely dry for maximum gentleness for sensitive fabrics such as silk and wool.

* See table of programs on Page 58

Drying Cabinet

Drying cabinets are common in Scandinavia, where the climate often requires that you can dry all types of clothes quickly, even coarse outerwear and shoes. A drying cabinet is practical but also gentle on your most sensitive fabrics since it uses no mechanical action that can wear your clothes, the air stream transports residual moisture and it's almost like drying outdoors.

Drying with extra care

Check the labels on your clothes and you'll see that many garments and materials need very careful treatment. Silk, velvet and satin, for example, need to be handled with care. That's when a drying cabinet comes in handy.

All garments unsuitable for a tumble dryer find a perfect solution in a drying cabinet, eliminating the need for air-drying or adding clutter to your home.

Less mess

With a drying cabinet, you can dry your family's sweaters, shirts, coats, shoes, gloves and more in a neat, organized way. It's a brilliant way of taking care of your family's clothes while keeping the house neat and tidy.

Also for shoe care

It's not just rubber boots that can be dried in a drying cabinet. All leather shoes need to rest between each use to allow moisture to escape. If you use them before they have dried, the seams will eventually break and they will lose their fit. Put them in the drying cabinet when you get home from work and they are ready for your evening walk an hour later.

24" DRYING CABINET

Features

LIMITED WARRANTY – RESIDENTIAL APPLIANCES

ASKO warrants to the original purchaser (the “ASKO Customer”) of the ASKO product (the “ASKO Product”), who purchased the ASKO Product from a distributor, dealer, manufacturer’s representative or other seller who has been authorized by ASKO, that this ASKO Product is free of defects in materials and/or workmanship, subject to the terms and conditions set forth herein. This Limited Warranty covers parts and labor, except as set forth in this Limited Warranty. Service must be provided by an authorized ASKO service company. **YOUR SOLE AND EXCLUSIVE REMEDY UNDER THIS LIMITED WARRANTY SHALL BE PRODUCT REPAIR AS PROVIDED HEREIN.** This Limited Warranty is valid only when the ASKO Product is used in the country in which it was purchased. Proof of original purchase date is required to obtain service under this Limited Warranty. This Warranty only applies to the original purchaser and is non-transferable.

Residential ASKO Products Used Exclusively for Household/Personal Purposes:

Two (2) Years limited Warranty – Any warranty service claims for residential ASKO Products must be filed with ASKO within two (2) years from date of purchase. Service will be provided during normal business hours.

Residential ASKO Products Not Used Exclusively for Household/Personal Purposes or used Commercially or used in Marine, Mobile or Aeronautical Applications:

One (1) Year limited Warranty – Any warranty service claims for ASKO Products not used exclusively for household and personal use, or used commercially or used in marine, mobile, or aeronautical applications must be filed with ASKO within one (1) year from date of purchase. Service will be provided during normal business hours.

ITEMS EXCLUDED FROM WARRANTY

This Limited Warranty does not cover:

1. Replacement parts or repair labor if the ASKO Product is used in a manner that is inconsistent with published user or operator instructions and/or installation instructions.
2. Service calls to correct the installation of the ASKO Product, to instruct you on how to use the ASKO Product, to replace or repair house fuses, or to correct house wiring or plumbing.
3. Consumable items and parts, such as filters.
4. Damage resulting from accident, alteration, misuse, abuse, negligence, fire, flood, acts of God, improper use, improper installation, installation not in accordance with electrical or plumbing codes, or use of products not approved by ASKO, as well as any attempted repair by other than authorized ASKO service companies.
5. Cosmetic damage, including scratches, dents, chips or other damage to the finish of the ASKO Product, unless such damage results from defects in materials or workmanship and is reported to ASKO within 5 days from date of purchase.
6. Pickup and delivery. The ASKO Product is intended to be repaired in your home.
7. Repairs to parts or systems resulting from unauthorized modifications made to the ASKO Product.
8. Expenses for travel and transportation for product service if the ASKO Product is located in a remote area where service by an authorized ASKO service company is not available.
9. The removal and reinstallation of the ASKO Product if it is installed in an inaccessible location or is not installed in accordance with ASKO’s published installation instructions.
10. Replacement parts or repair labor on ASKO Products with original model/serial numbers that have been removed, altered or cannot be easily determined.

DISCLAIMER

YOUR SOLE AND EXCLUSIVE REMEDY UNDER THIS LIMITED WARRANTY SHALL BE PRODUCT REPAIR AS PROVIDED HEREIN. EXPRESSLY DISCLAIMED ARE ALL OTHER EXPRESS AND IMPLIED WARRANTIES, INCLUDING ANY IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. Some jurisdictions do not allow exclusion or limitations regarding warranty rights. This Limited Warranty gives you specific legal rights and you may have other rights that vary from jurisdiction to jurisdiction. Attempted repair by any person other than an authorized ASKO service company will void this Limited Warranty.

LIMITATION OF LIABILITY

IN NO EVENT SHALL ASKO OR THE MANUFACTURER AND THEIR RESPECTIVE PARENTS, SUBSIDIARIES AND AFFILIATES BE LIABLE FOR CONSEQUENTIAL, INCIDENTAL, EXEMPLARY, PUNITIVE OR SPECIAL DAMAGES. IN NO EVENT SHALL ASKO OR THE MANUFACTURER AND THEIR RESPECTIVE PARENTS, SUBSIDIARIES AND AFFILIATES BE LIABLE FOR DAMAGES OTHER THAN ACTUAL DAMAGES AND IN NO EVENT FOR DAMAGES IN EXCESS OF THE PRICE PAID FOR THE ASKO PRODUCT AS TO WHICH A CLAIM IS MADE. Some jurisdictions do not allow the exclusion or limitation of incidental, consequential or other damages, so these limitations and exclusions may not apply to you. This Limited Warranty gives you specific legal rights. You also may have other rights that vary from jurisdiction to jurisdiction.

TROUBLESHOOTING & ASKO CUSTOMER CARE

If you think you need repair service, first see the “Troubleshooting” section of the Use & Care Guide. If you are unable to resolve the problem after checking “Troubleshooting,” then additional help can be obtained by calling ASKO Customer Care at 1-800-898-1879. Read the “Troubleshooting” chapter before contacting the Customer Care Center. Make a note of the details on the rating plate (see illustration below) positioned. Make a note of the (1) service number, (2) item number and (3) serial number.

SERVICE AFTER EXPIRATION OF LIMITED WARRANTY

For information about obtaining parts and labor after expiration of this Limited Warranty or arising outside the scope of this Limited Warranty, please contact ASKO Customer Care at 1-800-898-1879. After your purchase and prior to first use of the ASKO Product, register your ASKO Product with ASKO by utilizing the address information below. Should you need further assistance as well, contact us at the address information below:

Orders: All orders and any subsequent change orders must be submitted in writing and delivered to Milestone by mail, fax or e-mail. No telephone orders will be accepted. Special Order items are Non-Cancellable.

Prices: All prices are subject to change without notice and are exclusive of any sales or use taxes, shipping, delivery, special packaging, or handling charges that may apply to each customer or to each order.

Minimum Advertised Pricing: All sales are subject to Milestone or Manufacturer minimum advertised prices. Failure to comply with minimum advertised prices will result in cancellation of any agreement and violators will not be entitled to purchase further products.

Minimum Sale Price: All sales are subject to Milestone or Manufacturer minimum sale prices. Failure to comply with minimum sale prices will result in cancellation of any agreement and violators will not be entitled to purchase further products.

Freight and Handling: Milestone reserves the right to ship products by its choice of carrier. All shipments are F.O.B. from place of shipment, and risk of loss shall pass to the Buyer upon delivery to the carrier at the point of shipment. Additional charges may apply for special handling and packaging.

Deliveries: Milestone shall not be liable for failure to deliver or for delays in delivery or performance due to: (1) causes beyond its reasonable control; (2) acts of God, acts of Buyer, acts of civil or military authority, governmental allocations or controls, fires, strikes or other labor difficulties, riots or other civil disturbances, delays in its usual source of supply, delays in transportation; (3) any other commercial impracticability. In the event of such delay, the date of delivery or performance shall be extended for a period equal to the time lost by reason of the delay.

Claims: All claims for non-conforming delivery of Products must be made within twelve (12) days of receipt of shipment.

Damage or Loss: Any claim for damage or loss in shipment should be made to the carrier immediately by the customer. Products become the responsibility of the Buyer when accepted by the carrier in good condition from Milestone and we are not able to process shipping damage claims.

Returns: Only Items marked in this Price List as "Stock Item" are subject to return. All other items are considered Special Order Items and are NOT RETURNABLE. No Products may be returned without a Milestone Return Goods Authorization (RGA) Number issued prior to the return of Product. Any product returned without an RGA will be refused and returned to the sender. RGA's are valid for thirty (30) days only. All returns are subject to inspection before being approved for credit - products must be in salable condition to be considered for return or replacement. A 30% restocking charge will apply to all returns.

Payment: Unless otherwise noted, payment terms are Net Due on Receipt. Balances owed on invoices over 30 days old are subject to a 1.5% per month charge. Each shipment or delivery shall be deemed to have been sold under a separate and or independent contract and payment thereof shall be made in accordance with the terms of this agreement and of the invoice rendered by Milestone. Buyer agrees that title to the personal property described herein shall not vest in Buyer until paid in full. In the event of insolvency or the filing of bankruptcy by the Buyer, Buyer agrees to return all merchandise to Milestone.

Warranties: Products distributed by Milestone are the products of reputable manufacturers sold under their respective brand or trade names. Milestone shall use its best efforts to obtain from each manufacturer, in accordance with the manufacturer's warranty or customary practice, the repair or replacement of products that may prove defective in material or workmanship. The foregoing shall constitute the exclusive remedy of the Buyer and the sole obligation of Milestone. Except as to Title, THERE ARE NO WARRANTIES, EITHER WRITTEN, ORAL, IMPLIED, OR STATUTORY relating to the described products which shall extend beyond that described in this paragraph. NO WARRANTY OF MERCHANTABILITY OR OF FITNESS FOR PURPOSE SHALL APPLY.

Limitation of Liability: Milestone's liability on any claims for loss or damage arising out of this contract or from the performance or breach thereof or connected with the supplying of products hereunder, or its sale, resale, operation or use, whether based on warranty, contract, negligence or other grounds shall not exceed the price allowable for such products or parts thereof involved in the claim. Milestone shall not, under any circumstances, be liable for any labor charges unless agreed upon in advance and in writing by Milestone and the manufacturer of the products involved. Milestone shall not in any event be liable for special or consequential damages, including, but not limited to, loss of profits or revenue, loss of use of the product or any associated product, cost of capital, cost of substitute products, facilities or services, downtime costs, or claims of customers of the Buyer for such damages.

General: The possession of this Price List by anyone is not to be considered as an offer to sell any of the Products contained herein. This Price List supercedes all previous price lists or memorandums. Milestone's existing Trade Terms and Conditions remain in effect. The above Terms and Conditions shall be a part of all Orders accepted by Milestone and shall supercede any conflicting provisions of our customer's purchase orders. These terms and conditions are subject to change without notice.
